BLITZ
Battery 12V

maintenance-free

manual
disposal details

Dear customer,
with this BLITZ-Battery you have purchased a high quality product, manufactured by Ullis Motorradladen GmbH.
Please pay attention to these instructions. If you follow them, you will be satisfied by using this battery.
We wish you a good ride and many fun all the time.

First using:

The battery is immediately ready for use.
No acid is to be filled in.
It can not be wrong, if the battery will be charged a little bit,
before they will be used first time.

Normal using:

The adjustment of the regulator remains 14.3 volt.
The battery has a voltage of 13.0 volt.
If the voltage falls below 12.4 volt, please recharge it.
If your motorcycle has more like normal vibrations, it is
necessary to use a battery support like foam rubber

Recharging with external charger:

If the battery is not used for a longer time, maybe you
must recharge the battery.
Please do not overcharge it.
Use an automatic charger.
Maximum charge rate: 4 ampere.

Storing / long standing-times:

The colder it is stored, the lower the discharge of the
battery will be.
If the motorcycle is not running for a long time, you should
disconnect one pole to avoid discharge.

Disposal:

The battery contains lead.
The disposal must be environmentally compatible.

***German laws dictate to sign
the battery with this pictogram.
This means, it is not good for
our nature to put old battery into
the normal trash box.
In Germany it is totally forbidden.
Please attend to your national laws.***
